Video Audition Recording Tips

• You may use a phone camera. Special equipment is not necessary.

• Make sure that you are visible in the video.

• It is best to use the rear camera rather than the front facing (selfie) camera. The rear camera is usually higher resolution.

• If possible, have someone press the record button and stop the video for you.

• Record in an open space in your home that does not have too much echo (avoid bathrooms and closets).

• Record when you can have quiet and no interruptions.

• Film in a well-lit space. Avoid sitting with your back to a window or lamp to avoid backlighting.

• String players should make sure that their F holes face the camera.

• Listen to your video before submitting to ensure that sound levels are correct and not too distorted.
